Seeking an opportunity to work in a competitive environment to prove my skills and utilize my knowledge in the growth of Organization.

## Educational Qualification's

B.Tech (EE)	JECRC, Jaipur	RTU	2020	65.93%(Upto VI Sem,)
XII	Central Public Sr. Sec. School, Kota	RBSE	2015	69.20%
X	Central Public Sr. Sec. School, Kota	RBSE	2013	78.17%

## Skills

Basic knowledge of C

## Project

### Typhoon HIL Simulation on DC motor Speed Control

The main objective of this project is to learn “Hardware in Loop” in Typhoon HIL and design a Closed loop speed Control System for DC motor.

### Digital Temperature Sensor

Measurement of temperature using sensor LM35 and displaying it through 16x2 display.

## Summer Training

### 220 KV, Grid Sub Station, Sitapura, Jaipur (01 May 2019 – 30 June 2019)

A substation is a part of an electrical generation, transmission and distribution system. Substations transform voltage from high to low, or the reverse, or perform any other several other important functions. Between the generating station and consumer, electric power may flow through several substations at different voltage levels.

## Extra-Curricular

Active Member of IETE Society.

Core Team Member in JECRC Techno cum Cultural Fest Renaissance (2019)
